

MANUFACTURING CAPABILITY PACKET

Aluminum and stainless assemblies, built to your print.

FWM helps OEMs take fabricated parts and assemblies from drawing review to first article and repeat production. Fabrication, welding, supporting machining, assembly and inspection are coordinated from our Hudson, New Hampshire manufacturing floor.

Welded aluminum structural frame at FWM.

Custom fabricated aluminum burner shed enclosure.

What we build

- Welded frames, skids and equipment bases
- Enclosures, panels and fabricated assemblies
- OEM products and private-label programs
- Aluminum and stainless assemblies with machined features

How the work comes together

- Cutting, forming and part preparation
- Welding, fixturing and supporting machining
- Mechanical assembly and inspection
- Documentation, packaging and shipment

Start with your application.

Share the part or assembly, drawing revision, material, quantity and timing. A first article with a credible production path is welcome. Drawings can follow an initial discussion or an NDA.

PRODUCTION EXPERIENCE + PROGRAM REQUIREMENTS

A finished product you can examine. A scope your team can review.

Finished FWM AV Series vaporizers on the production floor.

Define production fit

- Material, drawing revision and critical interfaces
- First-article quantity and acceptance process
- Annual demand, release sizes and target dates
- Packaging, labeling and shipment requirements

Selected published equipment

Emmegi profile machining, Okuma vertical machining, production saws, forming equipment and welding stations. Confirm the working envelope and process plan for your assembly.

FWM's own vaporizer product line

FWM manufactures ambient-air cryogenic vaporizers, including DVAP liquid-cylinder/Dewar products and AV models for larger gas-supply applications.

OEM and private-label programs can start from an FWM platform or a customer drawing, subject to application and engineering review.

See the production example and published product information:
fwminc.com/programs/vaporizer-manufacturing

Agree on the quality package

- Material certificates and lot/heat traceability
- Drawing-based dimensional and first-article records
- Weld, test or cleaning documentation where specified
- Certificates of conformance as agreed

Confirm scope before commitment

Required certifications, code stamps, weld qualifications, test methods and outside processes are reviewed for each job. This packet does not establish blanket certification or product suitability.

Send the requirements. Agree on the next step.

Discuss a project at fwminc.com/contract-manufacturing. Upload drawings or arrange an NDA at fwminc.com/manufacturing-review. Product specifications and availability are maintained on the website and confirmed for the requested configuration.
